

Data Integrity & Transparency

What are your responsibilities if you learn about data discrepancies between manuscripts and other source documents, such as reports?

Should all data, regardless of quality, be published?

What should be done about clinical data when the sponsor has changed business focus?

Professional Standards

What are your responsibilities for accurately conveying qualifications and competencies?

Publication Practices

What are your responsibilities when you discover a possible premature submission?

Should your publication team use a scientific lexicon? **NEW**

Should members of a company's upper management team be reviewers and/or approvers of scientific publications? **NEW**

Authorship

How do cultural differences affect authorship?

Should medical writers ever qualify for authorship?

What are the authorship considerations for narrative reviews by industry employees? **NEW**

Should authors be added or removed late in publication development? **NEW**
